CARBON,

ALBERTA.

And a Savings Account Not Yet Opened

What about the resolution made at the beginning of 1922 to start a savings account? Is it going to be the same story at the end of the year—nothing saved for the future?

Do not continue putting it off. A small amount will open an account.

The assurance, independence and satisfaction which the knowledge of something in reserve always begets will be incentive enough for building it up.

LOCAL NEWS

A meeting of the Village Council was held on May 1st. Present: W. Braisher and George Wise.

It was moved and carried that Secy. write all parties that have not got their premises cleaned and privy pits dug, to have same done before the end of the week, or same will be done by the Village and charged to the parties concerned.

The following building permits were granted: W. Braisher, 5 room house on lots 1-2-3 Block 15. Alex Reid, office or warehouse on lot 34 Block 2. Mr. Miller, addition to dwelling house on lot 8 Block 2. Moved by W. Braisher that Secy. see Mr. McKinnon about building of a tower for keeping of a fire apparatus and a place for the Klaxen Horn, and get his prices, also estimate for lumber.

It was moved and carried that Secy. have a Horse Tie built some where near the back of lots 6-11 or Block 5, about 100 or 120 ft. in length. Moved and carried that Secy. write all parties having horses, cattle, chickens, or any other kind of animals running at large in contravention to the Village Herd Law, that the same must be kept from running at large within the limits of the Village.

Permission was granted to Mr. Elliot to plant trees in front of lots 30 to 33 Block 19.

Moved and carried that a By Law be passed for the loan of \$1000 from the Bank of Montreal.

ALEX REID

Secy.

Mr. R. A. Boyle spent the week end in Calgary.

The Miners sent word to town that they were coming Sunday to play ball against Carbon. This will be a good chance for the Carbon Ball players to turn out and get lined up for the season.

Meeting of Carbon Board of Trade was held on Tuesday May 2nd when a fairly good representation of the business men attended. The following new officers were elected: J. A. MacDonald President, J. R. E. Coburn Vice-President, J. J. Greenan Secretary Treasurer, C. H. Nash and W. Braisher Councillors.

The membership fee was reduced from \$5.00 to \$2.50 per annum and every business man in Carbon interested in the progress of the town should become an active member of the Board of Trade.

Mr. F. F. Francis was appointed a delegate to interview the C.P.R. Officials at Calgary in company with R. B. Wilkison and some of the members of the Transportation committee of the Calgary Board of Trade with a view to establish a passenger and express service between Carbon and Calgary.

The Secretary read the correspondence which has been carried on for some time between the Board of Trade, the C. P. R. and the Alberta Government Telephones which has resulted the Government agreeing to install a telephone in the C. P. R. Station within a short time.

How about a ball game for next Wednesday?

CAR OWNERS TAKE NOTICE.

On and after May 10th 1922 action will be taken against every person found operating a motor Vehicle without having his necessary number plates for the current year 1922. One front and one rear attached according to the Motor Vehicle Act of Alberta.

A. P. POLICE,
Carbon District.

Mrs. Hummel and Alice Wyers left Carbon Thursday for England where they will visit relatives for several months.

Cure For Hard Times

Business conditions in Canada are not good at the present time, and, while this Dominion is probably in better shape than most countries, that in itself is poor consolation. Instead of endeavoring to find excuses for present conditions, the chief business of every individual citizen should be to find a remedy and effect an improvement. And the hopeful feature of the situation is that an improvement is not contingent on what Governments, Banks and big financial and industrial corporations may, or may not, do. Betterments will be the result of the actions of individuals.

Somebody made the remark a short time ago that hard times had come. This is challenged by one of the most widely travelled and best informed men in Western Canada who says that the person making such a remark was in error, and that he should have said "soft times have gone." We are not so sure that even this is the correct way of putting it. Rather we would say that too many people are acting on the assumption that soft times have come.

There is only one remedy for the existing economic ills from which all are suffering, and that is work. Not work by a few, but work by all. Not a minimum of work, but the full maximum of work of which one is capable. Not work as it is advocated by the six-to-eight hour day, five days a week, agitators but work as understood in the biblical injunction "six days shalt thou labor"—that is a hard, honest day's work.

A financial man who recently made an extended trip throughout Western Canada studying conditions, states that wherever he went he heard such questions as, "What are the banks going to do?" "What are the manufacturers, the railways, the Governments, the farmers, going to do?" But in no single instance did he hear a business man or artisan say what HE was going to do. There is, as this man said, a mighty serious epidemic of "Let George do it" sweeping the country at the present time, and many business men have the disease in a more or less virulent form.

Commenting on the situation as this man found it, a writer in one of the trade journals says: "It has got so that the popular indoor and outdoor sport of today is 'passing the buck,' and yet we are wondering what is the matter with business. We are all waiting for the other fellow to start something, and feel deeply offended when he signals for us to make the first move. The world has grown so used to play that it cannot settle down to work. The boss is talking and thinking golf. In a few weeks he will be playing golf, and his employees pattern themselves upon him. The stenographer spends the best part of her short working day planning what she will wear to the next dance. The office boy is wondering how many grandmothers he will be able to safely bury during the baseball season. It is the aftermath of the boss taking up golf, under the excuse that he is 'keeping' himself fit to play more golf."

"There's nothing wrong with business that I can see," said this observant traveller, "but there is a whole lot wrong with business men. Too many people are drawing their pay and their breath, and that is about all they do draw—they are trying to look prosperous even if they don't feel prosperous." They are wondering, and waiting, for others to get busy while idling themselves.

It is well to remember, declares the trade journal from which we have already quoted, that success comes in cans and failures in can'ts. There is only one letter between the two, but it makes all the difference in the world as far as results are concerned, and it is results that count.

The remedy for present hard times, or soft times, is to get away from present-day delusions, and to get back to the good old biblical methods, namely, hard work, bending the back, elbow grease and by the sweat of brows, coupled with the average amount of brains and general thrift, things will soon right themselves.

The great present-day need is confidence coupled with energy and a will to do. Confidence in our country and in our country's institutions, but above all confidence in ourselves. It is time we quit blaming all our misfortunes and troubles on the war, and after-war effects. Millions of men and women during the war learned to look to Governments and semi-government institutions for clothing, food, and the wherewithal to live. This was inevitable when men were taken from their ordinary avocations for military service. But the time has long since arrived when people must stop leaning on such supports, and must exert themselves and provide for themselves. Instead of relying on others to do for them, they must do for themselves. In a word, they must develop their old self-confidence and set to work for themselves.

Until all individuals realize these things, and until they learn that a continuance of so-called soft times in reality means and brings about hard times, the country will wallow in the slough of business depression and unemployment.

CORNS

Lift Off with Fingers

Doesn't hurt a bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers. Truly!

Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the calluses, without soreness or irritation.

W. N. U. 1417

Kitchen Lore

The lighter the pastry the more the flour is sifted.

Rice is delicious boiled in milk and served with sugar and cinnamon.

Hot unsweetened cocoa may be used instead of scalding milk in cup custard for those who prefer the chocolate flavor.

Add a teaspoonful of baking powder to old potatoes when they are to be mashed. It will make them light and creamy.

Add a little salt to the water when preparing hard-boiled eggs. The eggs when taken from the water, are cracked and the shell is easily removed without the white sticking fast.

No one need endure the agony of corns with Holloway's Corn Remover at hand to remove them.

England has a mill-girl magistrate in the person of Miss Mary Anne Dews, a cloth-weaver in the town of Dewsbury, and who has recently been appointed a justice of the peace.

Minard's Liniment for Burns, etc.

Britain Pays Again

U.S. Receives Second Installment for Silver Bought During War

Payment of \$19,672,500 by Great Britain as the second installment on the debt of \$122,000,000 created by the Government's purchase of silver during the war has been reported by the treasury of the Federal Reserve Bank of New York.

The payment consisted of \$18,300,000 of principal and \$1,372,500 of interest. A further installment of \$12,200,000 on the debt is due May 15, which will cut Great Britain's debt in half.

Under the arrangement for payment by Great Britain on the silver purchases, the debt will be liquidated in May, 1924, these payments being entirely apart from the \$5,000,000,000 of war loans due the United States from Great Britain.

DIGESTIVE TROUBLES CAUSE MUCH DISTRESS

Are Nearly Always Due to Thin, Watery Blood

Do not think that because your stomach is easily upset you are the victim of some serious malady. One of the most common causes of indigestion is anaemia, or thin, watery blood. In fact it has become generally recognized that healthy activity of the stomach is impossible unless the blood is rich and red.

Dr. Williams' Pink Pills have been found valuable in cases of indigestion, nervous dyspepsia and stomach weakness, just because they are a blood builder and nerve tonic. The rich, red blood following their use not only imparts a healthy digestion, but carries color to the cheeks and lips, and gives vigor to the muscles. One important point to remember is that Dr. Williams' Pink Pills contain no harmful drugs or opiates and are thus to be preferred to preparations that merely stimulate for a time. Before you begin worrying unnecessarily about your state of health, try the tonic treatment of Dr. Williams' Pink Pills. You will be surprised to see how rapidly your appetite returns and your debilitated system revives. Miss Sarah Farquhar, North Brookfield, N.S., who has proved the value of these pills in cases of this kind says: "For a long time I was a sufferer from indigestion, which seemed to carry with it a complication of other troubles. Every meal brought misery with it, as the eating was followed by severe pains in the stomach, causing at times nausea and vomiting, and at other times an accumulation of gas that caused severe palpitation of the heart and a smothering sensation. The result was that my general health was seriously affected and the least exertion would tire me out. I had taken much medicine, but did not get more than temporary relief until I began using Dr. Williams' Pink Pills, which I took for a considerable time, with the result that I now enjoy every meal and am no longer distressed after eating. I find myself in every way enjoying better health, and I cheerfully recommend these pills to similar sufferers."

You can get Dr. Williams' Pink Pills through any dealer in medicine or by mail at 50 cents a box or six boxes for \$2.50 by writing The Dr. Williams' Medicine Co., Brockville, Ont.

Girls attending the San Francisco high school of commerce have placed a ban on silk hosiery.

ONTARIO MOTHER HELPS DAUGHTER

Mothers—watch your daughter's health. From the time she reaches the age of twelve until womanhood is established she needs your care and advice. Many women have suffered years of ill-health through lack of such care during this time.

Lydia E. Pinkham's Vegetable Compound is a splendid medicine for girls and women. For nearly fifty years it has been helping mothers and daughters. Let it help you and your daughter.

Hamilton, Ontario.—"When my daughter was thirteen and until she was fifteen she suffered every month so that she could hardly move around the house and when she would have the pains in school she would have to be carried home. Besides the pains and the irregularity she also had headache, dizzy spells, and soreness in her back. I saw your advertisement in the 'Hamilton Spectator' and got Lydia E. Pinkham's Vegetable Compound for her. She does not have the least bit of trouble now, and we both recommend your medicine. She works in a candy-shop now and seems well and strong. I give you permission to publish this letter as a testimonial."—Mrs. I. P. CLAUDE, 76 Walnut St., South, Hamilton, Ontario.

In her back. I saw your advertisement in the 'Hamilton Spectator' and got Lydia E. Pinkham's Vegetable Compound for her. She does not have the least bit of trouble now, and we both recommend your medicine. She works in a candy-shop now and seems well and strong. I give you permission to publish this letter as a testimonial."—Mrs. I. P. CLAUDE, 76 Walnut St., South, Hamilton, Ontario.

Rheumatism Is Now Gone And Wellington Walks Well As Ever

"I heard so many people telling what Tanlac had done for them that I tried it in my own case and I am convinced it is a wonderful medicine," said David Wellington, a well-known drug clerk, Harperusa, Manitoba.

"For five years I had been a sufferer from rheumatic fever. I simply ached all over from head to foot and my bones felt like they were going to crack. My knees were so stiff actually I used to walk like I had wooden legs, and I just dragged one foot after

the other. Everything I ate seemed to sour on my stomach and I was bothered a good deal with backache and headaches.

"I began to improve gradually from the first dose of Tanlac and kept it up until my stomach was in perfect condition and the rheumatism had left me. I am in splendid health now and feel that it is only right that I should tell my experience so that others who suffer as I did may know where they may get relief, too."

Tanlac is sold by all good druggists.

Say Canada is Better Market

Conditions Here Much Better Than in U.S. at Present

N. T. Bowman, advertising manager of the Toronto Telegram, who returned from an extended visit to a number of Eastern United States cities, says that many American concerns find sales conditions much better in Canada than in the U.S. at present.

One large firm which uses newspapers almost exclusively in both countries, carrying space of identical size in papers on both sides of the border, and keeping close check on results, reports that during the past year their sales declined 14 per cent. in the United States as compared with only 6 per cent. in Canada.

Another firm, manufacturing a widely-known toilet specialty, although not divulging actual figures, is not less thoroughly convinced of the superiority of conditions in Canada at the present time. This concern also pays scrupulous attention to results, and it is as a direct outcome of their recent experience that they have recently commenced a very extensive campaign in Canada, using large space in newspapers and magazines.

Mr. Bowman reports that both agencies and advertisers in the United States are devoting a great deal more attention to Canada than has been the case for many years.

Chinese Guarded Silk Secret

For centuries after its first discovery—China carefully preserved the secret of silk culture, and amassed great wealth by exporting it to India, Persia and Arabia.

Asthma Cannot Last when the greatest of all asthma specifics is used. Dr. J. D. Kellogg's Asthma Remedy assuredly deserves this exalted title. It has to its credit thousands of cases which other preparations had failed to benefit. It brings help to even the most severe cases and brings the patient to a condition of blessed relief. Surely suffering from asthma is needless when a remedy like this is so easily secured.

Artificial Daylight

Surprising Results are Obtained by Use of Special Colored Glass

One of the most interesting problems in illumination is to provide an artificial source of light which will exactly reproduce ordinary daylight. Such a source of light is invaluable in the textile industry and for the making of fabrics. One way of obtaining the desired result is to filter the light of an electric or other lamp through special glasses, but a British inventor recently produced another form in which all the light is reflected from an umbrella shaped reflector on which patches of certain colors are painted. All the light used comes from this reflector and is modified by the colors to give a very exact imitation of daylight. An improved form of this artificial daylight apparatus has just been patented. The reflector consists of two layers of material perforated with holes so that a certain number of spots of the colors are exposed. Radial strips of another color are placed over the perforated layers, the whole arrangement being mechanically strong and giving the correct areas of the various colors to provide artificial daylight.

Mr. L. R. Littlefield, of McNairy County, Tenn., has 234 direct descendants, including 77 grandchildren, 133 great-grandchildren, and 14 great-great-grandchildren. Mrs. Littlefield is 92 years old.

Minard's Liniment for Dandruff

Ontario Mineral Production

It is estimated that in the decade's history of mining in Northern Ontario, the various mines have contributed more than \$750,000,000 to the wealth of Ontario.

HEART WOULD BEAT LIKE A TRIP HAMMER

Heart trouble has of late years become very prevalent. Sometimes a pain catches you in the region of the heart, now and then your heart skips beats, palpitates, throbs, or beats with such rapidity and violence you think it is going to burst.

You have weak and dizzy spells, sinking sensations, are nervous, irritable and depressed, and if you attempt to walk upstairs or any distance you get all out of breath.

We know of no remedy that will do so much to make the heart regain strength and vigor, regulate its beat and restore it to a healthy normal condition as will

MILBURN'S HEART AND NERVE PILLS

Mrs. Chadwick, Delhi, Ont., writes: "I had palpitation of the heart, and the least exercise, such as going upstairs or up a hill, my heart would beat like a trip-hammer and at times I was dizzy-headed and had a sinking sensation as if my time were near."

A friend suggested I try Milburn's Heart and Nerve Pills, so I procured three boxes, and by the time the first one was used I began to improve. In all I took six boxes, and now although in my 66th year I feel like a young girl; no dizziness or heart-thumping, and can walk miles without fatigue. At time of sickness I weighed 120 lbs. now I weigh 150."

Price 50c a box at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Still Solvent

The Portrait Artist.—Yes, I can make a colored crayon enlargement of your photograph, but I don't recommend it. Have you ever been done in oil?

Mr. Newgilt.—Yes, I've been done in oil and trimmed in rubber stocks, but I got money enough left to pay for that colored crayon picture.

Perk Up and Smile

Blues and Backache Vanish

Toronto, Ont.—"Less than a year ago I was in a very poor state of health; my back ached dreadfully and I could scarcely drag myself around to do my housework. I started to take Dr. Pierce's Favorite Prescription and I cannot praise it too highly for the great benefit I received. The backache and pains disappeared entirely and I soon was restored to perfect health. I know that Dr. Pierce's Favorite Prescription is the best woman's medicine, for nothing ever helped me as much as this 'Prescription.' I have no hesitancy in recommending it to other women who suffer as I did."—Mrs. Kathleen Whillans, 13 Brookfield St.

Reap the Reward of Perfect Health

Orillia, Ont.—"I had a bad case of woman's trouble, suffered from backache, nervousness, and disordered digestion. I had great pain all the time, sometimes I would faint at my work. I had one physician after another but they did me no good. I then took nine bottles of Dr. Pierce's Favorite Prescription and it fixed me up all right, I look much better and feel fine. I will recommend the 'Prescription' to all suffering as I did."—Mrs. Maybelle B. Gratrix, Box 940.

Health is most important to every woman. You cannot afford to neglect it when your neighborhood druggist can supply you with Favorite Prescription in tablets or liquid. This Prescription is made in Dr. Pierce's Laboratory in Bridgeburg, Ont. Send 10c there if you wish a trial pkg.

Compulsory Powers Of Wheat Board Are Not Allowable

Ottawa.—Reconstitution of the Canadian Wheat Board, with compulsory powers, as requested in the memorandum of the Canadian Council of Agriculture and pressed for by Progressive members of the House of Commons, is ultra vires the Parliament of Canada, according to an opinion by the Deputy Minister of Justice, E. L. Newcombe, and tabled in the Commons by the Prime Minister, Hon. W. L. Mackenzie King.

Mr. Newcombe, whose opinion is concurred in by Sir Lomer Gouin, Minister of Justice, and Hon. D. D. McKenzie, Solicitor-General, holds that the appointment of a Wheat Board, with compulsory powers, interferes with the rights of provinces and of individuals and is, therefore, against the provisions of the British North America Act, 1867. Parliament, however, has an undoubted right to create a board with voluntary powers.

"It is my opinion," said Mr. Newcombe, in the document tabled "that the reconstitution of the Wheat Board in the present circumstances with the powers conferred thereon by the orders-in-council is a project constitutionally incompetent to the Parliament of Canada."

The Deputy Minister of Justice deals at length with the powers which were conferred upon the old Canada Wheat Board, and says: "It will be perceived that these powers naturally group themselves into two heads. There are enabling or facultative provisions and there are compulsory provisions. As to those of the former class, I apprehend that Parliament has undoubted authority to constitute a board for the purpose of buying and selling and to enable it to contract and to exercise such powers as are necessary or incidental to a voluntary undertaking.

"The board is, however, invested with compulsory powers and, for the purpose of considering the authority of Parliament to constitute a commission clothed with these powers, it is well to mention some of these separately. They include: (a) fixing of maximum prices or margins of profit at which flour may be sold by millers; (b) the compulsory taking of wheat in store or in transit to compensation fixed by the board, including power by order of the board to transfer the property in any wheat so stored or in transit to such purchaser and upon such terms as the board may nominate and prescribe; (c) prohibition of the buying and selling of wheat in Canada on commission or otherwise and the operating of elevators or warehouses for wheat except by license of the board; (d) authority to regulate delivery to the board of all wheat sold or purchased in Canada; (e) regulation by the board of the dealings of its licensees.

Brule Mine Busy

Taking on Men at Rate of Ten a Day

Edmonton, Alta.—That the coal strike has far from crippled the Blue Diamond mine at Brule, is the contention of Manager Gordon Dickson. At present there are 462 men on the payroll of which number 210 are working underground and the daily output is 800 tons. The mine is running on the non-union, open shop basis and new men are being engaged at the rate of ten a day.

The management hopes to reach its former daily average of 1,500 tons daily before the end of the month. Representatives of the United Mine-workers are still picketing the station at Brule.

Living Cost Declines

London.—The cost of living in Great Britain fell a further four points in March. On April 1 it was still 82 per cent. above the pre-war level.

British Doctor Dies

London.—The death is announced of Sir Alfred Pierce Gould, widely known surgeon. He was 70 years of age.

W. N. U. 1417

Airplane Badly Damaged

Aviators Require New Machine to Continue Flight to Brazil

Rio Janeiro.—The Portuguese aviators who were attempting a flight from Portugal to Brazil, will be unable to proceed in their hydro-airplane from St. Paul Rocks, a few hundred miles short of their goal, where they landed because of damage to their machine, according to a Havas despatch from Pernambuco. The message says their hydro-airplane was so badly damaged in effecting the landing that it is no longer usable. The aviators, however, expected to save the motor.

The estimated distance flown is approximately 900 miles, thus making the time of their airplane approximately 60 miles an hour. Plans had been made for big celebrations on the arrival of the aviators at Pernambuco, Bahia and Rio Janeiro.

Schools in Sweden Are Using Films

Elaborate Plans Being Made for Teaching from Movie Screen

Stockholm.—Swedish school children are beginning to read their lessons from the movie screen. The use of educational films is becoming more and more a part of the lower grade curriculum, even in the most remote districts, and leading educators are making elaborate plans to extend the scope of "film classes."

In the city of Gevele, Northern Sweden, the children are said by visiting American professors to know more about Manhattan Island than young students in western parts of the United States who never have visited the metropolis.

One of the most prominent champions of films as a means of study is Prince William, second son of King Gustaf, who has taken complete motion picture outfits with him on his trips of exploration through Central America and South Africa.

Solve Mystery of Missionary's Death

Report Shows Priest Was Drowned in Northern Lake

Edmonton, Alta.—The mystery attaching to the death of Rev. Father P. Frapsauce, of the Great Bear Lake Roman Catholic Mission, has at last been cleared. Major G. L. Jennings, officer commanding the R.C.M.P. here, has received a report from Staff-Sergeant S. C. Clay, in charge of the Fort Norman detachment, which shows that the missionary lost his life by drowning in the waters of the northern lake.

As is customary with the Mounted Police, every avenue of evidence in connection with the tragedy has been explored, and the report emphasizes the thorough manner in which investigations at the top of the map are made by Canada's frontier service.

Ammunition Dump Explodes

Belgrade.—A terrific explosion occurred at Monastir, in the southern part of old Serbia, when an ammunition dump blew up. The railroad station was destroyed and enormous damage otherwise done by the blast.

The number of killed and wounded, says the despatch from Monastir reporting the explosion, is still unknown.

Try to Stop Swearing Habit

Montreal.—The Licensed Victuallers' Association, the liquor dealers organization of Montreal, has had placards printed in both languages, nicely mounted and framed in glass, which they will distribute to all taverns, restaurants, etc., of this city calling for a cessation of the habit of swearing and blasphemy.

Abolish Police Forms

Vienna.—The police forms which every traveller in Austria was formerly obliged to fill out upon arrival in a city, giving intimate details of himself and his business, are to be abolished.

WESTERN EDITORS

W. J. Bartlett, Editor of The Enterprise, Blairmore, Alberta.

Losing Many Cattle

Experts Discover Dehorned Cattle Fed on Clover, Die

Toronto.—Correspondents of the Ontario Department of Agriculture in Bruce County, have discovered considerable loss of life among cattle has occurred in dehorning after being fed on sweet clover ensilage. They say several farmers have reported that on dehorning cattle they found considerable difficulty in stopping the blood flowing and in several instances the animals bled to death. In all cases the cattle had been fed on the sweet clover diet.

Cannot Participate In Conference

San Marino Has Not Resumed Relations With Central Powers

Genoa.—San Marino, the smallest but oldest republic in the world, has applied through an accredited plenipotentiary for participation in the economic conference. Her envoy was told that San Marino had not yet resumed relations, juridically, with the Central Powers, and that she could not participate in negotiations between countries that were signatories to the peace treaties which terminated the world war.

Germany's Claims Against Russia

London.—The total German claims against Russia, including bank deposits, railway shares and industrial claims generally, were about £72,000,000, it is reported in financial circles of London. Against this, Russia, in accordance with the Versailles treaty, had claims several times greater.

Danes Sell Soviet Seed

Copenhagen.—In spite of the official Soviet declaration of a boycott on all Danish goods for Russia, the Soviet representative here signed a contract with Danish seedsmen for the early delivery in Russia of seed to the value of 3,900,000 kroner.

The Treaty Between Russia And Germany Must Be Abrogated

Would Stop Daylight Saving

Member Moves a Resolution in the Federal House

Ottawa.—Daylight saving held the stage in the House when W. F. Kay (Liberal, Mississauga) had a motion calling for an expression of opinion that "it is desirable that legislation should be introduced this session to prohibit the adoption of daylight saving time in any part of Canada." Generally speaking, the trend of opinion was against daylight saving, although the desirability of the resolution in its existing wording was questioned.

Wm. Duff (Liberal, Lunenburg) had an amendment. He moved that the motion merely expressed the opinion of the House that "it is not desirable that daylight saving time be adopted in any part of Canada." Discussion was still in progress when the House adjourned. The resolution and amendment now go over on the order paper to the end of public bills and orders. It is unlikely that anything further will be heard of them this session.

Second Sum For Cancer Cure Discovery

Lord Atholstan Offers Another Hundred Thousand as Prize

Montreal.—Lord Atholstan, proprietor of the Montreal Star, has decided to donate the \$100,000 he is giving for cancer research to the Interior Cancer Research Fund of London, of which Earl Balfour is chairman, while a second sum of \$100,000 is offered as a prize for the discovery of a cure for cancer, it was learned here. This latter amount was the sum originally offered by His Lordship and is open to the world, the award to be decided by the Royal College of Physicians and Surgeons, of London, England.

High Price For Bread in Russia

Pound Loaf Now Being Sold for 120,000 Roubles

Helsingfors.—A person just arrived in Finland from Petrograd states that the price of bread in Russia during the last few days has been increasing by leaps and bounds. The pound loaf cost on March 16th, 85,000 roubles; on the 17th, 90,000 roubles; on the 19th, 100,000 roubles; and on the 20th at Oserki, a few miles from Petrograd, 120,000 roubles were being charged.

No recent Petrograd figures are available for purposes of comparison, but the price of rye bread in Moscow on March 6 was 60,000 roubles the pound, and a month earlier 23,000 roubles.

Paris.—Mr. Lloyd George is reported in Genoa advices received here to have informed Dr. Wirth, the German chancellor, that there were only two possible solutions of the present deadlock.

The first was that the Germans must cease to be admitted to the discussions of Russian affairs at the conference.

The second was that they must tear up and scrap the treaty made with the Russians.

Chancellor Wirth, the messages state, while regretting the severity of the latter alternative, did not refuse to take it under consideration and is reported virtually to have accepted it in principle.

The German delegation is active among the other delegations, said these advices, in an effort to obtain a repeal of the Allied decision pronounced against them. The Germans were particularly insistent in pointing out to the Italian delegation that the departure of the German delegation from Genoa would greatly compromise the conference.

The German delegation was reported to be divided on Mr. Lloyd George's proposal that the Russo-German pact be scrapped, with Dr. Wirth accepting it in principle and Foreign Minister Rathenau opposing it.

No Notes Taken For Income Tax

Regarded Only As Acknowledgement of Debt, But Not As Payment

Ottawa.—Hon. W. S. Fielding takes the ground that it is undesirable to make public transactions between the Government and private citizens in regard to income tax, it was indicated by the finance minister in the House of Commons.

In reply to a question put by R. H. Halbert (Progressive, North Ontario) as to whether notes had been accepted by the Government in payment of income taxes in addition to the note received from the Riordon Pulp and Paper Company, Mr. Fielding said:

"Several notes were received which were regarded by the officials as acknowledgment of the indebtedness, but not as payment. No such notes are now received.

"The Minister of Finance has doubt of the propriety of making public transactions between the Government and citizens respecting income tax. In England, it is understood such information is regarded as confidential. The right of Parliament to full information regarding public business being recognized, a predecessor of the present Minister of Finance held that if information of this kind was desired, a notice for it should be placed on the order paper, and upon discussion, the House should judge whether the public interest required it to be brought down."

British Arranging Loan to Brazil

Amount is Understood to Exceed Five Million Pounds

London.—The London Times learns that the negotiations for a loan to the Brazilian Government are approaching completion. It is hoped to issue the loan within a fortnight. It will be issued by the Barings, Rothschilds & Schroder. The amount will be a considerable one. Its main purpose is to take up banking credits arranged last year against coffee warrants which are understood to exceed £5,000,000. The loan will be secured on coffee.

Arbuckle Films Banned

New York.—Cancellation of all contracts for the showing of films in which Roscoe (Fatty) Arbuckle appears was announced by Will H. Hays, head of the Motion Picture Producers Association. This action, he said, affected nearly 10,000 contracts.

Spend your money at home, thereby helping your own town and local merchants.

Swinging Of Pendulum Will Now Be Used For Locating Oil Or Gas

We have all stopped before a clock and watched the pendulum go to and fro, and tick off the seconds of time in its ceaseless work. Why it ticks off seconds, we probably do not know, and furthermore do not care—we simply know that it is its business to do so. However, there is a reason; it is dependent upon the length of the pendulum and upon the force or pull that causes it to oscillate. If we change its length the period will be different, or if we change the force or pull, retaining the same length, the period will again be different.

The pull or force is essentially the attraction of the earth upon the displaced bob of the pendulum, so that if we allow a pendulum of invariable length to swing in different parts of the earth and note the number of swings it makes, say in an hour or in a day, it will give us a measure for determining the difference of pull or attraction of the earth, which would mean that it would tell us the relative distance that we are from the centre of the earth at the various stations of observation. From this it is obvious that the figure or ellipticity of the earth may be found by means of the pendulum.

The figure and rotation of the earth affect the pendulum in two distinct ways. In the northern hemisphere going southward, say from Ottawa to Washington, we get a little farther away from the centre of the earth on account of the equatorial bulge. Then, furthermore, at Washington the centrifugal force is greater, there is a greater tendency to fly off; so that altogether the pull at Ottawa is greater than it is at Washington.

It may be observed that a miner, weighing his gold in the Yukon by means of a spring balance and believing it to represent so many pounds and ounces, would naturally be surprised if he weighed that same gold with the same spring balance in Ottawa, before turning his gold over to the Mint, to find that it weighed less here by something like the 550th part of what it weighed in the Yukon. This is due to no fault of the scale whatever, but simply that gravity is less at Ottawa than at places further north. This is one reason why spring balances are illegal as appliances for weighing. The greatest difference in gravity upon the earth is between the poles and the equator, where the difference amounts to fully one two-hundredths.

With the great many pendulum observations, or gravity observations, as otherwise called—because by means of the pendulum we determine the gravity of the earth—distributed over many parts of the earth, besides actual linear measurements which have been made, the figure of the earth is determined with a high degree of accuracy, so that at any given latitude we know in advance what the theoretical value of gravity should be or, which is the same thing, we know accurately the length that the pendulum must have in order to swing seconds there.

The mean density of the earth, which is a little over five and a half times that of water, has been well determined and more so the densities of the many different kinds of rock formations and other minerals that constitute the crust of the earth, upon which the oscillations are dependent. Any change in the distribution of them will, therefore, affect the time of the oscillations of the pendulum. It is obvious that the nearer matter is more effective than than matter more remote in its attraction on the pendulum.

All the preceding is to explain and emphasize that the oscillation of a pendulum is dependent upon the distribution of matter around it and below it.

We are just now at the point of revealing what the pendulum shows and by work carried on by the Dominion Observatory. Let us here say a few words of the pendulums used for gravity observations. These pendulums have no clockwork. They swing on an agate plane supported by an agate knife-edge. The time of oscillation of a single swing is determined to an extraordinary degree

of accuracy—to the one ten-millionth of a second of time—the time being derived from the stars.

Hence, if we set up our apparatus, at a place whose latitude is accurately known, and determine the time of oscillation of the pendulum, whose period is known at a given place, like Ottawa and Washington, we will find whether there is an excess or defect of mass about the station or place. In another word, and the revelation is made. We find, for instance, that the pendulum swings too quickly for that particular latitude, which would mean that there is an excess of mass acting on the pendulum. Such a result would absolutely preclude the presence of oil or gas in the rock formation. This is surely something worth knowing to the prospector or company about to drill for oil or gas. It seems a far story that the pendulum, quietly and almost invisibly swinging with small amplitude, in a small exhausted iron case, should tell so surely and so well whether oil or gas are below it; for where oil or gas are, the same space cannot be occupied by dense rocks, and if dense rocks are present to excess there cannot be oil or gas in any quantities present, so that the pendulum tells us positively of the absence of oil or gas.

If, on the other hand, we find that the pendulum is swinging too slowly, when its period is too long, this would mean that there is present a defect of mass, the reason for which may be oil, gas or rock of small density, so that while the pendulum is able to predict definitely the absence of oil and gas, which may mean the savings of thousands of dollars uselessly expended in the search for these desirable commodities, it only forecasts the possibility of the presence of oil or gas.

Iceberg Travels Across World

Monster Berg from Frozen North Seen Near Honolulu

A strange sight has been witnessed in mid-Pacific.

For the first time, as far records go, an iceberg has floated from the frozen north right down the Pacific into the region of the tropics, and has been seen off Hawaii by a Japanese liner that was on its way to San Francisco.

The Shinyo Maru was exactly one days journey out of Honolulu when the master, Captain Maki, saw the iceberg. At first he could not believe his eyes, and supposed that it was a particularly large whale, but when he turned his glasses upon the object it was evident what it was.

A New York writer who was on board, and others on the vessel, confirmed the fact, and now scientists are trying to explain the iceberg's presence in this unusual quarter of the globe.

It is supposed that an exceptionally gigantic berg broke off from the Arctic ice-cap, passed out of the Behring Sea, and was caught in the North Pacific current after successfully rounding the Aleutian Islands.

Of course, as it travelled through the warmer waters it must have gradually melted, but its immense initial size enabled it to reach the tropics as a great berg. Capt. Maki estimated its length when he saw it at about two hundred feet.

It would be interesting to know its further history, but, in any case, it cannot have long survived after reaching tropical seas.

Will Provide Help for Farmers

In anticipation that between 3,000 and 3,500 men will be required for seeding operations on the farms in Saskatchewan, the Bureau of Labor is planning to provide that amount of help for the farmers this coming season. It is announced at Regina. The estimated number of men required is about the average of the past few years.

Arctic Menu

The natives of Wrangel have a diet of great variety. In order of importance the items on the daily menu may be set down as follows: Fish, cooked fish, raw fish, seal, walrus, bear, sea-gull, whale, moss, frozen fish, smoked fish, and fish oil.—Ottawa Journal.

Bulgarian Women Working

Volunteer Labor Army Doing Much to Restore Country

Even King Boris' two sister, the Princess Eudoxie and Nadejda, will be obliged to contribute their share of work to the Bulgarian state under the new compulsory labor law, which requires all women up to 30 years of age to serve at least 10 days of their time every year in useful work to the community.

This ruling has been made by the stern peasant premier, Alexander Stamboulisky, the most powerful man in Bulgaria and maker and breaker of kings.

Bulgarian women, said the premier, will be compelled to make garments and bed linen for hospitals, contribute useful labor to orphanages and asylums, help to care for the poor and so on. Girls under 20 years old will be obliged, for a period of three months in each year, to study domestic science and the useful arts, so that they may become more productive factors to society and contribute to the common good.

Premier Stamboulisky says that one of the causes of Bulgaria's rapid recovery from the work is the work done for the state by what is called there the volunteer labor army.

A return ticket sold by any railway to a passenger travelling over its lines would be good on any other railway operating between the same terminal, by a bill to amend the Railway Act, introduced in the House by A. R. McMaster, Liberal, Brome, on behalf of S. W. Jacobs, Liberal, George Etienne Cartier. The bill was given first reading.

Most Natural Thing in the World

A Scotchman crossing the road one day saw a threepenny bit lying in the mud. He stooped to pick it up and was struck by an automobile with fatal results. At the inquest the facts were put before the coroner, who gave the verdict as "Death due to natural causes."

Concerning Skunks and Other Things.

"STELLA, dear," cried a Brownie, breathlessly running to her from the direction of the Get Little Pool, "a rather large bird has just reached the End-of-the-Earth and wants to see you. We asked him his name, but he was so exhausted when he got here that he could hardly speak, and so we couldn't understand."

"Very well," Stella smiled, "I'll go and see him. I suppose I had better bring my wand with me, for I am sure to be asked to make some wish come true."

When they arrived there, however, their tired, thirsty visitor had drunk so deeply of the Get Little Pool and had consequently become so little that they couldn't even find him until a faint call from him showed them where he was roosting in the lower branches of a tree near the pool.

"Hello!" laughed the Fairy. "Who are you?"

"I am a Hoatzin," was the answer that drifted down from the tree, "and I'm so fagged out that I somehow feel as though I just couldn't move. You see," he added, "I have flown all the way from South America and I'm not used to flying. We Hoatzins never fly if we can possibly help it."

"A bird that doesn't fly!" exclaimed Pinzie. "Why, that's almost as unlikely as a fish that doesn't swim! Just what do you do? Stand on your head?" And Pinzie grinned and giggled, which so annoyed the Hoatzin that he immediately forgot how tired he was and flew down in their midst.

"No, smartly, I don't," he angrily said to Pinzie, "but I have sharp claws, and you'll feel them unless you are more polite!"

Pinzie was just about to throw off his funny little Brownie shirt and engage in battle when Stella stepped between them.

"Here, here!" she cried. "Let's all be friends. Tell me, Hoatzin, have you a wish? Is that why you made such a tremendous effort to come here?"

The Bird nodded. "I wish for some means of protecting myself."

"How about those wonderful, sharp claws of yours?" teased Pinzie from behind Stella's skirts, but the Hoatzin paid no attention.

"I suppose you know about a very pretty little black and white animal called a Skunk," Stella said. "It had the same wish as yours, which I granted by giving it a disagreeable strong odor that other animals and even humans will go out of their way to avoid it. I shall do the same for you, though in your case it won't be necessary to give you quite so strong a means of protection."

The Hoatzin looked a little anxious. "But," he exclaimed at length, after having thought things over, "as I soon will grow used to my new disagreeable gift and as my enemies never will, why should I care! It's a wonderful idea, and thanks ever so much, Stella."

The Fairy waved her magic wand over his head and immediately the Hoatzin had such a disagreeable scent that the Brownies ran away. He gave a harsh grating hiss as they left him, which is what all Hoatzins do when they are annoyed, and then he flew to the Get Big Pool, for he wanted to drink from it so as to once more be his usual size before flying back to South America.

Then Stella saw that he was about as large as a Pheasant, with olive and white upper feathers and dull brown stomach ones. The tip of his tail was brilliant yellow—the same shade as his very beautifully curved crest. He was really an exceedingly lovely Bird.

Hoatzins live in groups near rivers, swamps or lakes. Their nests are built of loose sticks close by the water, and Mrs. Hoatzin lays four yellowish eggs that are flecked with rusty red. The babies when hatched have no feathers, but they have long, strong claws which they use for climbing among the branches aided by the beak as well.

Hoatzin's or "Stink Birds" (as they are often called) dislike flying, and they rarely use their wings except to go from tree to tree.

Copyright, 1922.

Fort Prince Of Wales The Most Northerly Fortress On This Continent

Dominion Agricultural Publications

Bulletins on Important Subjects Can Be Obtained on Application

Besides the reports of the divisions and experimental farms, stations and sub-stations of the Dominion Experimental Farms System, the Publications Branch of the Department of Agriculture at Ottawa announces that bulletins on the following subjects may be had on direct application: Bee Diseases; Beef Scrap versus Skim-Milk for Egg Production; Commercial Feeding Stuffs; Fertilizers for Flowering Plants, Vegetables, Small Fruits and Lawns; List of Publications, Outlook for Dairying and the Marketing of Dairy Produce; Swine Husbandry in Canada (3rd edition); Why and How to Use Milk; Crop Rotation; the Potato, Its Cultivation and Varieties; Seed Treatment for Smut; the Control of the Corn Borer; the Control of Grasshoppers; Beautiful Homes and How the Farmer May Make Them.

Mineral Dyes Made in B.C.

The first consignment of finished product was turned out recently from the Pacific Colour Company's plant at Chilliwack, B.C. The plant, which has a capacity of three tons of dry dye colour a day, is the second to be opened in America to take advantage of a German method of preparing mineral dyes and colours. The raw material used is lead ore from Field, and subsidiary ingredients from Bunson Lake district, British Columbia.

The X-ray is used in aeroplane construction to detect defective materials, weak metal castings and workmanship, which would otherwise escape the eye of an inspector.

On February 4, 1922, the old Fort Prince of Wales, which occupies the west peninsula at the mouth of the Churchill River, Hudson Bay, was placed by order in council, under the control of the National Parks Branch of the Department of the Interior, and will henceforth be preserved as one of the chief historic memorials of Western Canada. The old fort has the distinction of being the most northerly fortress on the American continent, and, at the time of its completion, in 1747, was the strongest fort in North America, not even excepting Quebec.

According to the original plans its walls were to have been 42 feet thick, but, owing to some objection on the part of the Governor they were first built 25 feet thick. This, however, was judged inadequate, after a certain amount of heavy gun practice, and one section of the wall was pulled down and rebuilt according to the original specifications. The fort mounted 40 guns, carrying from 6 to 24 pounds.

In August, 1782, Samuel Hearne, the Hudson's Bay explorer and Governor of Fort Churchill, received the astonishing information that England and France were at war, and that Admiral de la Perouse, with a force of 400 soldiers, was waiting outside of the fort for his surrender. As a prisoner, he witnessed the efforts of the French Admiral to demolish the massive fortifications, which had taken fourteen years to build. Since that time the fortress has remained a picturesque and romantic ruin, uncertain of its fate, and always in danger of being blotted from the national memory. There is now every probability that, in the course of time and as opportunity offers, the old fort will receive the attention and care from the National Parks Branch that are being devoted to other historic sites, and that the old ruin, with the fifty acres of land attached, will become an interesting feature of the ever-extending scheme of Dominion parks.

One Beauty of Winter

Snow Acts as Silencer and Gives Relief from Noise

One beauty of a Canadian winter is that it deadens noise. The snow comes and puts a silencer on the traffic on the streets, and the double windows aid it in keeping out noise. It might be said that these windows also keep out the dust, but perhaps that is offset by the dust the furnaces and stoves make—but suppose there were both!

Just think of this now the spring has come and the time almost for no more snow and no more double windows, and later on ponder over Carlyle's words: "That which the world torments one in most is noise. It is the devil's own infernal, din all the blessed day long, confounding God's work and His creatures. A truly awful combination; and the worst of all is a railway whistle, like the screech of 10,000 cats, and every cat as big as a cathedral."

And then try to prevent as many unnecessary noises as you can.—Kingston Standard.

Old Prophecy Fulfilled

The marriage of Princess Mary and Viscount Lascelles will fulfil a curious old prophecy, of which few people are aware. More than 150 years ago, in 1770, it was said—that one day the daughter of a King would be found in the Clanricarde family and would wear the famous jewels of that house. That is now coming true, for Lord Lascelles's mother was of that family, and it was from his uncle, the late Lord Clanricarde, that the bridegroom inherited not only a considerable fortune but the famous gems which Princess Mary is entitled to wear.

That's Politeness

A woman in a New Orleans hotel said to her 5-year-old neighbor one morning: "As your mother isn't with you this morning, my little man, I'll cut your steak for you if you think I can cut it the way you like it." "Thank you, ma'am," the small knight replied. "If you don't cut my steak the way I like it, I'll be sure to like it the way you cut it"—Exchange.

Quickly Relieves Constipation

Don't let constipation poison your blood and curtail your energy. If your liver and bowels don't work properly take **CARTER'S LITTLE LIVER PILLS** today and your trouble will be relieved. For dizziness, lack of appetite, headache and blotchy skin try them. Purely vegetable. Small Pill—Small Dose—Small Price.

WORLD HAPPENINGS BRIEFLY TOLD

A new judicial district, which will be known as the judicial district of Assiniboia, has been created by an order-in-council.

Charles Toth, of Boston, who expects to swim the English Channel in August, has engaged passage on the Winnifredian, sailing for Liverpool on July 6.

Preparations are being made by the University of Saskatchewan to resume this summer its field work on the soil survey of the province which was commenced a year ago.

The Canadian Government steamers Stadacona and Armentieres, tied up in idleness at Esquimaux for many months past, are offered for sale by the Dominion Government.

Two marine officers and a marine private were instantly killed at Quantico, Va., when two airplanes in battle practice locked wings in the air and plunged to the ground.

The Alberta Teachers' Alliance opposed the practice of school boards receiving applications for teachers and holding position open for the lowest bidder, in a resolution passed at the conference held at Calgary.

The shipping crisis in Italy has resulted in the tying up of 152 vessels of a total tonnage of 730,755. There are 50 vessels at Genoa, 27 at Naples, 18 at Venice, 16 at Trieste and 10 at Tesla.

Captain G. S. Little and Sergeant James L. Johnson, army fliers from Kelly Field, San Antonio, were killed when the airplane in which they were flying went into a nose dive at a height of about 100 feet.

Hazrat Mohani, president of the all-India Moslem League, and who headed the separatist movement in the last Moslem Congress, has been arrested at Cawnpore on a charge of sedition.

A conspiracy among Russian monarchists in Central and Eastern Europe to kill Nikolai Lenin if he dares to step outside Russia, is said by secret service men at Riga to have had more or less of a bearing on the fact that Lenin did not go to Genoa to attend the economic conference.

A call to Canadians living in New England to return home and help in the building up of their own country in the period of after-war reconstruction, was made by Lance J. Logan, member of the Canadian Parliament for Cumberland County, Nova Scotia, addressing a Canadian night meeting in Symphony Hall, Boston, under the auspices of the local organizations.

The First Watch Spring

In Early Days Watchmakers Used Pig's Bristle

In the early days of watch-making, science had not yet developed steel sufficiently to be made a part of the timepiece's delicate mechanism. It was therefore given to one of the commonest of barnyard animals—the pig—to make an important contribution to the science of horology. The first hair spring was actually made from a hog's bristle, and it worked very well indeed, and also served to demonstrate the correctness of the principle involved. The next step was the substitution of a steel spring, and this led to the development of the coiled hair spring which is in use in the modern watch.

POSSIBLY YOUR OWN WIFE

She may not look so young and pretty as she used to. If her cheeks are hollow and pale, if she is tired and nervous, her system needs a good regulating with Dr. Hamilton's Pills, a real medicine that is noted for restoring the bloom of health to sickly girls and women. Dr. Hamilton's Pills tone up the entire system. Complexion quickly becomes rosy, spirits rise, strength increases daily. Health, vigor and good looks will soon return to a faded woman, if she uses Dr. Hamilton's Pills. Sold everywhere, 25c per box, or from the Catarthzone Co., Montreal.

If the patient has faith in the doctor, should not the doctor trust the patient? That's why some doctors die poor.

NOTHING TO EQUAL BABY'S OWN TABLETS

Mrs. Georges Lefebvre, St. Zenon, Que., writes: "I do not think there is any other medicine to equal Baby's Own Tablets for little ones. I have used them for my baby and would use nothing else." What Mrs. Lefebvre says thousands of other mothers say. They have found by trial that the Tablets always do just what is claimed for them. The Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach and thus banish indigestion, constipation, colds, colic, etc. They are sold by medicine dealers or by mail at 25c, a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Same Old Stuff
She.—Am I the only girl you ever loved, Joe?

He.—Oh, I should say not, but my taste has been improving right along.

For years I have never considered my stock of household remedies complete unless a bottle of Minard's Liniment was included. For burns, bruises, sprains, frostbites or chilblains it excels, and I know of no better remedy for a severe cold in the head, or that will give more immediate relief, than to inhale from the bottle through the nasal organ. And as to my supply of veterinary remedies it is essential, as it has in very many instances proven its value. A recent experience in reclaiming what was supposed to be a lost section of a valuable cow's udder has again demonstrated its great worth and prompts me to recommend it in the highest terms to all who have a herd of cows, large or small. I think I am safe in saying among all the patent medicines there is none that covers as large a field of usefulness as does Minard's Liniment. A real trueism—good for man or beast.

CLAS. K. ROBBINS,
Chelogue Point.

Maxine Elliott is now the only actress whose name is borne by any New York theatre.

An Oil Without Alcohol.—Some oils and many medicines have alcohol as a prominent ingredient. A judicious mingling of six essential oils compose Dr. Thomas' Electric Oil, and there is no alcohol in it, so that its effects are lasting.

Keep your store of smiles, and your kindest thought, for home; give the world only those you have to spare.

CASTORIA

In Use For Over 30 Years

Always bears the Signature of *Chas. H. Fletcher*

London's House Shortage

Peculiar Stories Told in Court by Homeless People

Remarkable stories concerning the house shortage in London were told in the Bow Street County Court during the hearing of a batch of possessions summonses. One man said he had packed his family in one room while he slept in a shed in the garden throughout the winter. A woman said it was now customary to read the obituary notices and then enquire at the house whether the death meant accommodation for a lodger.

Another man told the court he had been married two years, but had never lived with his wife because his landlady refused to have her in the house. A new employment for commercial travellers was revealed namely, seeking houses and rooms for clients on commission.

As a vermifuge an effective preparation is Mother Graves' Worm Exterminator, and it can be given to the most delicate child without fear of injury to the constitution.

Unique Wedding Gift

The Slovaks of the Batchka district of Jugo-Slavia, in accordance with tradition, plan to present King Alexander with a shirt woven of pure gold and silver threads on the occasion of his marriage to Princess Marie of Rumania.

Dye Dress, Skirt Or Faded Curtains In Diamond Dyes

Each package of "Diamond Dyes" contains directions so simple any woman can dye or tint her worn, shabby dresses, skirts, waists, coats, stockings, sweaters, coverings, draperies, hangings, everything, even if she has never dyed before. Buy "Diamond Dyes"—no other kind—then perfect home dyeing is sure because Diamond Dyes are guaranteed not to spot, fade, streak, or run. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton or mixed goods.

One reason why some people never do much good is because they are unwilling to do a little at a time.

This Man Could Not Walk a Mile

WILLIAM GRAHAM SHOUTS THE PRAISES OF DODD'S KIDNEY PILLS

Hurt in 1919 He Searched in Vain for the Remedy He Needed Till He Started to Use Dodd's Kidney Pills.

Lindsay, Ont.—(Special).—Mr. William Graham, who lives at 162 Queen St. here, is shouting the praises of Dodd's Kidney Pills. And when he tells the reason why the story is truly wonderful.

"I was hurt in 1919, Mr. Graham states, 'the nerves in my left leg and arm were paralyzed. I was in such shape I could not walk a mile. I could not get out at night as I would be sure to fall over.'"

"I tried eleven doctors and used different liniments but got no benefit. Then I started to use Dodd's Kidney Pills and they did me a lot of good. Now I can walk fifteen miles. I recommend Dodd's Kidney Pills to all sufferers."

Dodd's Kidney Pills put the kidneys in shape to strain all the impurities out of the blood. That means pure blood. Pure blood means good circulation and that means new strength carried to all parts of the body.

Ask your neighbors if Dodd's Kidney Pills do not make strong, healthy kidneys.

Air Line Between New York and Chicago

Plan Provides for Two Planes to Carry 200 Persons

Daily flights between New York and Chicago by aeroplanes carrying hundreds of persons will be inaugurated soon, according to announcement by Mrs. Edith Rockefeller McCormick.

Mrs. McCormick said that she became interested in the plans for the air line two years ago. They provide for two passenger planes costing \$2,000,000 each with a capacity of 200 persons and 25,000 pounds of extra freight. The New York-Chicago trip is expected to take ten hours.

A little bit of patience makes the sunshine come, and a little bit of love makes a very happy home.

Minard's Liniment for sale everywhere.

A Record Casting

The largest iron casting ever made in Great Britain and one of the largest ever produced in any country, was recently turned out in a British factory. It weighed about 110 tons and the mould was built in a 16 foot pit. Seven hours were occupied in melting the metal, and the casting was poured in just under five minutes. Three weeks were occupied in cooling the casting. Owing to its enormous size and weight the casting had to be delivered by road, six traction engines being used for hauling it.

Hoarseness Rubbed Away Quickly by Nerviline

Changeable weather causes congestion and sore throat. The blood must be drawn from the inflamed part, and this is speedily done by applying Nerviline. The beauty of Nerviline is that it penetrates quickly. It is not oily and every drop sinks right in. It draws out the inflammation, eases the pain, makes the chest and throat well quickly. For relieving coughs, colds, hoarseness, Nerviline is the proper remedy. Thousands say so. Large 35c bottles sold everywhere.

Fine Instinct

"It seems to me," remarked the customer, as she watched the assistant trim the slice of ham she had bought, "you are wasting a good deal of that meat."

"Not at all, ma'am," he said gently, "I weighed it first."

Miller's Worm Powders destroy worms without any inconvenience to the child, and so effectively that they pass from the body unperceived. They thoroughly cleanse the stomach and bowels and leave them in a condition not favorable to worms, and there will be no revival of the pests.

Examining Fabrics by X-Rays

Can Test Fibre in Automobile Tires by this Process

X-rays have been employed in recent years for many other purposes than that of examining the tissues of the body. They have been employed in the examination of metals and of manufactured articles such as aeroplane parts. One of the latest and most interesting applications is in the testing of the fibres of the canvas used in the manufacture of pneumatic motor tires. In order to give a distinct X-ray photograph the yarn or canvas must be soaked in very dense materials which absorb the X-rays. This treatment is apt to damage the fibre, but a British company has managed, after many experiments, to produce a solution with which the material can be impregnated without any deterioration. The X-ray examination shows the extent to which the warp and the woof stretch, and it also reveals the changes in structure and in strength which a canvas undergoes when soaked in rubber solution. By means of this highly scientific treatment it is possible to determine how the canvas should be woven to remain square and strong.

Another British Trade Ship

Some time ago arrangements were completed for the building of a special vessel to act as a floating exhibition of British manufactures. For various reasons the voyage of this has been postponed for a year or two. Meanwhile a large British liner has been acquired for the purpose of being converted into a trade ship. The cabins will be used for the accommodation of the representatives; and the holds and other portions of the vessel will be adapted for exhibition purposes.

CATARRH

Catarrh is a local disease greatly influenced by constitutional conditions. HALL'S CATARRH MEDICINE is a Tonic, taken internally, and acts through the blood upon the mucous surfaces of the system. HALL'S CATARRH MEDICINE assists Nature in restoring normal conditions. All Druggists. Circulars free. F. J. Cheney & Co., Toledo, Ohio.

Arrogance dims the lustre of the most brilliant intellect and dulls the edge of the sharpest wit.

Minard's Liniment Relieves Neuralgia

Men are saved from many a little-ness and traditional slavery by looking away from themselves.

MURINE Night and Morning. Have Clean, Healthy Eyes. If they Tingle, Itch, Smart or Burn, if Sore, Irritated, Inflamed or Red. Apply Murine Granulated, use Murine often. Soothes, Refreshes. Safe for Infant or Adult. At all Druggists and Opticians. Write for Free Eye Book. Murine Eye Remedy Co., Chicago.

M. Poincare's Favorite Game

When the cares of his office weigh heavily upon him, M. Poincare, the prime minister of France, finds greatest consolation in his favorite game—dominoes!

The premier takes the keenest delight in opposing M. Millerand, the president, or Marshal Foch, and the three great men have spent hours on end fighting mighty battles at the game. M. Poincare's skill seems little less than magical, and even Marshal Foch's knowledge of strategy does not save him from defeat.

The Oil of Power.—It is not claimed for Dr. Thomas' Electric Oil that it will remedy every ill, but its uses are so various that it may be looked upon as a general pain killer. It has achieved that greatness for itself and its excellence is known to all who have tested its virtues and learned by experience.

Might be Useful

Thomas, the cartoonist, suggests a new speedometer for speeders. On the dial, plainly indicated, the arrow advances in the following order: Fine, Jail, hospital and morgue.—From the Ottawa Journal.

BEAUTY OF THE SKIN

Is the natural desire of every woman, and is obtainable by the use of Dr. Chase's Ointment. Pimples, blackheads, roughness and redness of the skin, irritation and eczema disappear, and the skin is left soft, smooth and velvety. All dealers, or Edmundson, Bates & Co., Limited, Toronto. Sample free if you mention this paper.

Dr. Chase's Ointment

"The Only Remedy" Says This Doctor

"The treatment of skin diseases (eczema) and diseases of the scalp is known to be difficult," writes Dr. W. L. Randolph. "However, there is one remedy that is known to be entirely dependable in this distressing and troublesome disease. I refer to D. D. D. Prescription."

If you have never tried D. D. D. for skin disease, whether a small spot, or whether one of the dreaded forms—the torment of eczema or the hard scales of psoriasis—get a bottle at once on our guarantee that if it doesn't relieve you your money will be refunded. \$1.00 a bottle. Try D. D. D. Soap, too.

D.D.D. THE Lotion for Skin Disease

If you cannot call at a local dealer's write to the D.D.D. Laboratories, Dept. W U-76, 27 Lyall Ave., Toronto, and they will send you free trial bottle if you enclose 10c, which merely pays for postage and packing.

SUMMER SCHOOL FOR TEACHERS.

Announcement has been made of the dates of the Summer School for Teachers at the University at Edmonton, which will be from July 3rd. to August 5th. Lectures will be based chiefly on the new curriculum for the elementary schools which goes into effect on Sept. 1st. next. This will afford teachers an excellent opportunity of becoming acquainted with the new curriculum. Classes will be organized in English, Citizenship, Industrial Arts, Music, Writing, Elementary Science, Physical Education, Agriculture and Household Economics.

FARM MANAGERS APPOINTED.

Farm managers for the two Government farms at Ponoka Mental Hospital and at the new home for mental defectives just North of Edmonton have been appointed. S. W. King of Claresholm Farm, a graduate of Guelph College, will be manager of the farm at the Ponoka Institution, while Neil McKinnon of the Sedge-wick Demonstration Farm will manage the farm near Edmonton. This is in accordance with the policy adopted by the new Government at the beginning of the year, of placing all farms in connection with Government Institutions under the direction of the Department of Agriculture.

NOTICE.

Grasshopper Pest

Meeting of the ratepayers of the Municipal District of Carbon No. 278 will be held at the following places on the date mentioned, to discuss the destruction of grasshoppers.

Monday May 8th, at 8 p. m. Orkney School House.

Tuesday May 9th, at 8 p. m. Carbon.

Wednesday May 10th, at 8 p. m. Hesketh.

Thursday May 11th, at 8 p. m. Church Hill School.

A representative of the Department of Agriculture will be present.

Jim Ramseys Purebred Airdale dog, which he brought from Vancouver, died on Wednesday after tangling with the wheels of a car.
